Outline

- ❖ Introduction
- ❖ Existing Approaches/ Related Work
- ❖ Problems in Existing Approaches
- ❖ Research Objectives
- ❖ Proposed Methodology/Model
- ❖ Results and Discussion
- ❖ Conclusion and Future Work
- ❖ References

Introduction

- ❖ Explain the background and motivation for the study.
- ❖ Define the key problem and objectives.
- ❖ Keep this short and engaging — no dense text.

Existing Approaches/ Related Work

- ❖ Summarize 2–3 key existing methods.
- ❖ Highlight their strengths briefly.
- ❖ Focus on their limitations that your work addresses.

Problems in Existing Approaches

- ❖ Clearly identify the gaps in current research.
- ❖ Use visuals or examples to illustrate challenges

Proposed Methodology

- ❖ Explain your method step by step.
- ❖ Keep slides visual (block diagrams, flowcharts).
- ❖ Mention what's new or different about your method.

Results and Discussion

- ❖ Present key graphs/tables — no more than 3.
- ❖ Compare your results with existing methods.
- ❖ Interpret what the results mean (not just numbers).

Conclusion and Future Work

- ❖ Summarize main contributions and results.
- ❖ Mention 1–2 ideas for future work or improvements

References

All references must follow the IEEE citation format. Use numbered references in square brackets [].

Follow the IEEE style for papers, books, and conference proceedings:

[1] A. B. Author, “Title of the paper,” *Journal Name*, vol. xx, no. yy, pp. zz–zz, Month, Year.

[2] A. B. Author and C. D. Author, *Title of the Book*, City: Publisher, Year.

[3] A. B. Author, “Title of conference paper,” in *Proc. Conf. Name*, Location, Year, pp. xx–yy.

[4] Website Name, “Title or Description,” Available: URL (Accessed: Month Day, Year).
